

PUERTO RICO STATE PE COMPLIANCE GUIDE

**ELEVATING PHYSICAL EDUCATION ACROSS
PUERTO RICO SCHOOLS WITH POCKET P.E.™**

ANNUAL MANDATED INSTRUCTION HOURS

Puerto Rico Policy: Public schools must provide all students across all grade levels with at least three hours of physical education per week. To ensure instructional quality, campuses with more than 250 students are legally required to appoint an additional physical education teacher for every 250 students or fraction thereof.

Pocket PE Solution: Pocket PE serves as an efficient curriculum mobile app that helps schools handle large student ratios and intensive hour tracking. The platform equips educators with a robust library of high-energy, structured PE lessons, allowing schools to maintain instructional fidelity and manage large classes while hitting the 3-hour weekly mandate.

PERFORMANCE STANDARDS ALIGNMENT

Puerto Rico Policy: Physical education frameworks must integrate modern technology tools—including computers, communication equipment, and audiovisual materials—as local financial resources allow. Exceptional programs that successfully foster physical activity and nutrition are eligible for the Puerto Rican Children’s Health Education Award.

Pocket PE Solution: Designed as a mobile-first, tech-forward platform, Pocket PE directly answers the island’s push for technological integration in the gym and classroom. The app delivers a high-quality, audio-visual physical education curriculum straight to any device, helping schools modernize their wellness programs with zero prep time and position themselves for prestigious state health awards.

STATE ENFORCEMENT, INCENTIVES, AND ACCOUNTABILITY

Puerto Rico Policy: Policy implementation is overseen by the Department of Education alongside the National Council to Link Sports, Recreation, and Physical Education. Compliance is monitored via mandatory annual reporting requirements to government authorities, though no specific financial penalties for noncompliance are detailed.

Pocket PE Solution: Pocket PE removes the administrative burden of policy tracking by introducing automated, real-time data collection. Through our centralized Admin Web Portal, school leaders gain direct oversight to monitor adoption, verify instructional minutes, and instantly export intuitive data reports—providing an airtight documentation trail to confidently satisfy annual government reporting and council reviews.
